EXPLANATION OF GROUP SYMBOLS

GROUPS OF TYPES 11, 12, 13, and 14:
- A-Wrappers
- B-Leaf and smoking leaf
- C-Cutters
- X-Lugs and primings
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 21, 22, 23, and 24:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 31:
- A-Wrappers
- B-Bright leaf, red leaf, and tips
- C-Lugs and cutters
- X-Trash and flyings
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 32:
- B-Heavy leaf or dull crop
- C-Thin leaf or bright crop
- X-Seconds and ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 35, 36, and 37:
- A-Wrappers
- B-Heavy leaf
- C-Thin leaf
- X-Lugs
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 41:
- B-Binders or tops
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 42, 43, and 44:
- C-Fillers (farm wrappers)
- X-Crop-run and stemming grades
- Y-Farm fillers or ground leaves
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 46:
- C-Superior
- X-Inferior
- Y-Defectuoso
- S-Scrap (Picadura)
- N-Nondescript

GROUPS OF TYPES 51, 52:
- A-Wrappers
- B-Binders, seconds, and brokes
- C-Fillers and short darks
- X-Stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 53:
- B-Binders, seconds, and brokes
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 54 and 55:
- B-Binders
- C-Fillers
- X-Crop-run and stemming grades
- S-Scrap
- N-Nondescript

GROUPS OF TYPE 56:
- B-Binders
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 61 and 62:
- A-Wrappers
- B-Stout wrappers and binders
- C-Fillers or tips
- S-Scrap
- N-Nondescript

GROUPS OF TYPES 81, 82, and 83:
- A-Wrappers
- C-Fillers
- S-Scrap

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS

Leaf Tobacco Stocks Above Year Ago

Inventories of all types 1/ of leaf tobacco owned by dealers and manufacturers in the United States and Puerto Rico totaled 3,509 million pounds on July 1, 1949 2/ (farm-sales-weight) - an increase of 65 million pounds above stocks a year ago. All of the 1948 crop had been marketed by July 1 except about one-third of the Maryland crop. During the second quarter this year around 90 million pounds entered stocks, consisting mostly of Maryland, Pennsylvania seedleaf, and Puerto Rican types.

Stocks of the Burley and Maryland types increased 7 and 8 percent respectively compared with July 1, 1948. Holdings of the other southern types decreased slightly with flue-cured being 1 percent lower, fire-cured 2 percent, and dark air-cured 3 percent less. For cigar-leaf, stocks of the filler and binder classes of tobaccos were lower than a year ago, whereas holdings of shade-grown increased about 14 percent. For foreign-grown types, stocks of cigar-leaf were down sharply in contrast to a large increase in holdings of foreign-grown cigarette tobacco.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. Tables in the body of the report show stocks on a farm-sales-weight basis; stocks in detail on a reported weight basis, subdivided according to recognized groupings; and stocks owned by dealers and manufacturers, separately.

2/ The general instructions for filing the tobacco stocks reports, required of dealers and manufacturers by the United States Department of Agriculture, specify that the report shall be made as of the opening of business on the first day of each quarter.

CIGARETTE-LEAF STOCKS

Flue-cured Stocks Down Slightly from Last July 1; Burley, Maryland, and Turkish Higher

Flue-cured leaf stocks were 1,538 million pounds as of July 1, 1949 - a decrease of 12 million from the carryover a year ago. The marketing year for flue-cured tobacco is on a July-June basis, and during the 1948-49 year disappearance as indicated by stocks totaled 1,102 million pounds as against 1,054 million during the preceding marketing year. Domestic consumption climbed to 715 million pounds, a new record high level, compared with 695 million pounds the previous year. Exports during the past marketing year increased to 386.5 million pounds from 359.1 million during 1947-48.

Stocks of Burley tobacco were the highest on record for this quarter, reaching 1,116 million pounds this year compared with 1,046 million on July 1, 1948.

Sales of the 1948 Maryland tobacco crop began in May and around 22 million pounds were marketed by June 30 from an estimated production of 35 million pounds. Stocks this July 1 were 51.2 million pounds compared with 47.3 million a year ago.

Holdings of Foreign-grown cigarette and smoking tobacco (Turkish and other) on July 1, 1949 were markedly higher, totaling 148.9 million pounds as against 126.7 million the previous July 1. Stocks of this type increased around 15 million pounds during the quarter.

DARK TOBACCO STOCKS

Fire-cured and Dark Air-cured Stocks Lower

Stocks of fire-cured tobacco dropped below the inventory a year ago, totaling 177.5 million pounds on July 1, 1949, compared with 180.5 million the previous July 1. A higher rate of exports during the current marketing year largely accounts for the lower stocks. Exports of fire-cured tobacco have amounted to about 31 million pounds for the first 3 quarters of the current marketing year (October-September basis) compared with around 21 million during the comparable period of the previous year. Fire-cured leaf stocks were divided as follows: 25.2 million pounds of Virginia fire-cured, 103.5 million of Eastern District Kentucky and Tennessee fire-cured, 48.4 million of Western District fire-cured, and 0.3 million of Henderson Stemming.

Dark air-cured tobacco holdings were also reduced from the previous July 1 level. Stocks this July 1 amounted to 81.9 million pounds compared with 84.7 million a year earlier. Exports during the first 9 months of the current marketing year (October-September basis) have amounted to about 12.1 million pounds, which are almost double exports during the previous marketing year. Stocks of dark air-cured by types on July 1, 1949 were 44.1 million pounds of One Sucker, 33.8 million of Green River, and 3.9 million of Virginia sun-cured.

CIGAR-LEAF STOCKS

Cigar-Filler and Binder Stocks Down;
Shade-grown Wrapper HoldingsGreater Than Previous July 1.

Inventories of the cigar types of tobacco totaled 367.4 million pounds (farm-sales-weight) on July 1, 1949 compared with 378.4 million a year ago. Larger exports of cigar-leaf compared with normal have been a significant factor in the reduction of domestic cigar-leaf stocks from a year ago. Stocks of foreign-grown cigar-leaf were 22.8 million pounds (unstemmed equivalent).

Total holdings of the cigar-filler types were below the amount on hand July 1 last year because of the sharp reduction in Puerto Rican stocks which was not compensated by increases in the Pennsylvania and Ohio filler types. Stocks of the cigar filler types were 211.6 million pounds compared with 222.0 million a year ago. Much Puerto Rican tobacco has been exported recently, whereas, normally only very small quantities go into the export market. The bulk of the 1948 crops of Pennsylvania and Puerto Rican types entered stocks during the second quarter this year. Stocks of cigar-filler leaf were divided according to types as follows: Pennsylvania seedleaf 120.5 million pounds, Ohio filler 28.2 million and Puerto Rican filler 62.9 million pounds of which 34.9 million were on the Island of Puerto rico.

Stocks of the cigar-binder types of tobacco were 139.2 million pounds - a decrease of 2.7 million from the previous July 1. Reductions in stocks of Types 51, 53 and 55 more than offset increases in holdings of Types 52 and 54. Inventories of the cigar-binder types as of July 1, 1949 were as follows: 30.7 million pounds of Connecticut Valley Broadleaf, 23.0 million of Connecticut Valley Havana Seed, 2.1 million of New York and Pennsylvania Havana Seed, 42.9 million of Southern Wisconsin, 40.4 million of Northern Wisconsin and 0.1 million of Georgia and Florida binder.

The shade-grown cigar-wrapper types showed an increase in stocks of about 2 million pounds compared with July 1, 1948 and were at the highest level reached in recent years. Stocks this July 1 totaled 16.6 million pounds of which 12.1 million pounds were Connecticut Shade-grown and 4.5 million Georgia and Florida Shade. Disappearance of shade-grown leaf during the 1948-49 marketing year (July-June basis) as indicated by stocks, totaled 12.1 million pounds compared with 12.4 million during the previous marketing year.

Table 1.--Average percentage of weight remaining after handling, sweating, drying, and stemming for all types of tobacco, and factors used for adjusting stocks reported by dealers and manufacturers to a farm-sales weight equivalent 1/

Foreign-grown cigarette and smoking tobacco	90	--	--	--	--	--	--	--	5 1.205	(6)

1 Information in this table taken from U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937. 2 Factors for converting unstemmed stocks to farm-sales weight are adjusted on the basis of an average loss on the reported weight and should not be taken as indicative of full shrinkage after handling, sweating and storage. 3 Ohio-Miami Valley filler types of tobacco packed in cases by growers before delivery. 4 See footnote 1 on page 5 for conversion factor to the farm-sales weight equivalent. 5 Tentative factor. 6 Factor has not been determined.

Table 2.--Stocks of leaf tobacco owned by dealers and manufacturers, by types, converted to a farm-sales-weight equivalent, July 1, 1949, compared with other quarters 1/

Total all types	11-90	3,508,660	3,444,152	3,186,896	3,851,391*	3,874,543	3,549,326

1/ For factor used in converting weights see table 1 except for cigar leaf. The instructions for reporting unstemmed cigar-leaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for July 1, 1949 are as follows: Type 41, 108; Types 42-44, 113; Type 51, 106; Type 52, 106; Type 53, 113; Type 54, 105; Type 55, 106; Type 56, 124; Type 61, 111; Type 62, 114. July 1, 1949 figures subject to revision.

2/ For explanation of stocks included in this classification, see footnote 6 on page 13.

3/ Foreign-grown leaf is converted to an unstemmed equivalent basis only.

4/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in April 1 report.

Table 3.-Production, stocks, supply, disappearance on a farm-sales-weight basis, and price of specified types, 1944-49 1/

FLUE-CURED, TYPES 11-14

1949	1/ 5,575	2/ 4,496	2/ 10,071		

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ Subject to revision.

3/ July 1 estimate, U. S. Crop Reporting Board.

1/ Subject to revision.
2/ See Supplementary Burley report on page 14.
3/ Most of the stocks in the X and Y groups will go into scrap chewing manufacture as well as part of that included in the scrap group.
4/ Includes Puerto Rican on the Island, Type 46.
5/ Type 84.-Other foreign-grown all shown in the C group.
6/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.
7/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.
* Revisions in April 1 report.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

2/ The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. The table should therefore be considered as representing only the approximate quantities owned respectively by dealers and manufacturers.

3/ Includes stocks on the Island of Puerto Rico.

4/ For explanation of stocks included in this classification see footnote 6 on page 13.

5/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

1/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners except (a) the original growers of tobacco; (b) manufacturers who in the first three quarters of 1948, according to the returns of the Commissioner of Internal Revenue, manufactured less than 35,000 pounds of tobacco, less than 185,000 cigars, or less than 750,000 cigarettes, pursuant to the provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress.

2/ Subject to revision.

3/ For explanation of stocks included in this classification see footnote 6 on page 13.

4/ Does not include Sumatra and Java leaf stored in the Free Trade Zone.

* Revisions in April 1 report.
